

NACECARE

SOFT FLOOR CARE SOLUTIONS

Discover why our clients choose NaceCare vacuums time and again.

Our equipment has an exceptional and long-standing reputation for their performance, reliability and efficiency. Designed with the operator, the environment and your cleaning standards in mind, our vacuums have helped maintain cleaner, healthier buildings for almost 40 years.

Advanced Innovative Technology

NaceCare has significantly improved the industry's leading canister and backpack vacuums by recovering more soil, doubling the life of the motor, reducing noise levels and delivering material savings in energy costs.

20% More Soil Recovery

What does it mean to recover 20% more soil? It means buildings are cleaner, floors look better, indoor air quality is improved and carpets last longer.

A Sustainable Approach to Cleaning

NaceCare canister vacuums use 40% less energy than other brands – without losing power or performance. CRI approved and LEED-B compliant, our canister vacuums reduce energy costs without sacrificing cleanliness or carpet appearance. A true win-win.

The Quietest Vacuums on the Market

Our canister vacuums are now 49 dB(A) and our battery vacuums are 49 dB(A), making them the quietest on the market. This means you can clean during daytime or busy hours, with less disruption to building occupants or residents.

Longer Motor Life

Behind every great vacuum is a great motor – and NaceCare leads the industry in motor life. In fact, Henry's motor life is almost 4X longer than an upright and 2X longer than most canisters and backpacks.

At 2,000+ hours of motor life, this machine lasts longer, delivers less down time and ultimately reduces the overall cost of operation. With a 5-year motor warranty, we proudly stand behind what powers our equipment.
